1. (S/NF/SK) Tasking: (Initial tasking data sheet attached). Ops officer indicated to monitor that source seems to have identified target in CRV-02 ("object/hi-tech/passing between/large/mobile/weapon"). Additional tasking:

- When was the weapon used (during a 14-day period centered around 15 Mar 84).?
- Determine where it was used and describe incident.
- Describe the weapon and how it is used.

2. (S/NF/SK) Session: Source was directed to review pages 6 & 7 of CRV-02 after being informed that the data therein correctly identified the target. Source began session in S4 by placing object in T column. S6 was employed in a time line search, to attempt to determine weapon "target", and to obtain cursory detail of weapon itself. Note: Monitor suspects that source was (subconsciously) avoiding what might possibly be an actual combat-type scenario during which time this weapon was used.

3. (S/NF/SK) Summary: Weapon seems to be normally housed in a large structure. Around 11 Mar 84, weapon was deployed and used, making a group of persons (possibly at the location where weapon is housed) very anxious. Place where weapon was used seems to be relatively flat, but large mountain range appears in the distance; this was the direction in which weapon was fired. Weapon is not "aimed" but merely "directed"

toward target. Weapon produces/projects a type of "destructive energy" which is not visible but is capable of "charring" or "pushing through" (NFI) a target. A very bright light, peculiar sound, and smell of "spark" is associated with the firing of the weapon. Weapon is transported atop a large, wheeled vehicle which resembles a missile carrier. The weapon itself may be fired from a raised position (AOL-TEL). At a point on the weapon where the "destructive energy" is emitted, a part is described as an "extremely smooth/shiny/silvery round/translucent/glass concave mirror."

4. (S/NF/SK) Feedback: Monitor informed source that more tasking regarding this target may be forthcoming.
